

SENTRY

CUSTOM SECURITY

Used in conjunction with Sentry QuickCheck™ Systems, the integrated media unlocker opens Video, DVD and CD security cases after the items have been properly checked-out.

This solution protects AV collections while maximizing the use of self-check systems and saving valuable Library staff time at the circulation desk.

Sentry's self-check stations can be integrated with Media Unlocking Devices that are compatible with security cases in use at the Library.

The technology currently provides automated, self service unlocking for Clear-Vu One-Time™, Benefit Denial™, and Zenith™ Pac cases; Gresco Ltd. Kwik Case™ and Playaway™ cases.

QuickCheck™ Systems

Available in Kiosk, Built-in and Desktop configurations

Integrated Media Un-locker

for QuickCheck™ Self-check Systems

Integrated Media Unlocker

Sentry solutions provide cutting edge technology for faster checkout and security. Locking cases add another layer of protection as the demand for AV materials (music, movies and games) increase.

The Integrated Media Unlocking device will allow patrons to unlock media cases once they have been checked out without the need for staff assistance.

Fast and easy-to-use simple instructions on the QuickCheck™ touchscreen guides users through the unlocking process and verifies that items are successfully checked out. User interface screens, help screens and graphic illustrations are customized for Libraries according to the type of cases and un-lockers in use.

Some competitive self-check solutions only open lock boxes using RFID technology while Sentry's Integrated Media Unlocker opens lock boxes for Libraries using RF, EM, and Barcode including RFID technology.

Gresco Ltd. Kwik Case™ Unlocking device opens all Kwik Security Cases and is integrated with the self-check.

Clear-Vu Decoupler Key opens all One-Time™ Security Cases and is integrated with the self-check.
