

QUICKCHECK™ QC5 RFID

RFID QuickCheck™ is an intuitive and easy to use patron self-checkout station. The system has a touch screen monitor and offers step-by-step instructions to guide patrons through the checkout process of all library materials including CDs, DVDs, and magnetic media.

The system is compatible with all ISO standard RFID labels and operates seamlessly with the library ILS. This unit programs and re- programs RFID tags, and can also perform barcode-to-RFID conversions.

Sidekick™ remote administration software is a unique tool to monitor the performance of single or multiple stations. This remote monitoring, administration, and report generating software is included with every QuickCheck™ system and can be installed in an unlimited number of library staff workstations

FEATURES AND OPTIONS

- Selectable checkout/in and renewals
- Multiple Languages included
- Easy staff access to receipt printer
- Patron selectable e-mail or printout of receipts
- Remote Monitoring and Administration
- Integrated AV Media Unlocker
- Multiple Item Theft Detection
- Web-based QuickHelp customer service
- Custom furniture and finishes

The Sentry RFID QuickCheck™ (Model QC5) provides patron checkout and renewals of materials via RFID tags and barcodes. When the RFID tag or barcode is read, an EAS/AFI security function is performed, the items are processed, and a receipt is printed informing the patron when to return materials to the library.

The RFID security feature prevents patrons from checking out more than one book under a single item identifier or substituting items during checkout.

QuickCheck™ stations can also be configured with an integrated Media Unlocking Device to open Video, DVD, and CD security cases. The system controlled unlocker allows patrons to open locked cases after they have been properly checked out.

Once the checkout process is complete, the patron exits the library through the RFID detection system. The entire self-service process is fast, user friendly, and increases productivity by freeing library staff to perform other tasks.

QuickCheck™ is available in Kiosk, Desktop and Built-in configurations.
