

EM SECURITY TAGS

Sentry Custom Security manufactures the highest quality Electromagnetic (EM) tags, ensuring accurate and reliable theft detection. EM tags cannot be shielded by briefcases, backpacks, the human body or other common objects.

Ultra-thin book tags fit deeply into the gutter of books. Double-sided and single-sided tags feature archival quality adhesive and will not degrade library materials.

Specialty tag configurations protect CDs and DVDs.

Deactivatable tags for circulating items can be turned “off” and “on” repeatedly while retaining their original effectiveness. Permanent, non-deactivatable tags are available for reference materials.

Tags are available with sequential barcodes for placement on books, magazines and other materials.

Sentry Custom Security EM tags are compatible with all industry standard EM detection systems and are guaranteed for the life of the item.

BOOKS

TailTag™ is an ultra-thin, double-sided adhesive tag that is placed between the pages of books, periodicals, journals, magazines and some hardcover books. Long tails for tag application do not stretch, providing better handling and easy insertion into the gutter of a book. TailTag™ is virtually invisible when located in the book.

SpineTag™ is a single-sided adhesive tag designed for hardcover books. Tags are inserted into book spines using a thin metal tool that slides inside the back of the cover to position the tag out of sight. SpineTag™ is virtually impossible to find and remove. Tags come in easy-to-handle sheets of 10 tags each.

QuickInsert™ is a double-sided adhesive tag that is placed between the pages of books, periodicals, journals, magazines and some hardcover books. The tags are laid out on a sheet of 16 and can be quickly and easily inserted into the gutter of the book with a simple hand-held insertion tool. QuickInsert™ tags are virtually invisible when applied and reduces costs by dramatically cutting labour hours.

CombiTag Kit™ is a single-sided adhesive tag that is placed on the cover of books, periodicals, journals and magazines. A special cover paper conceals the security tag and is printed with readable barcode data for checking materials in or out. The tags are laid out on a fan folded roll of 18 tags per sheet. Barcodes are pre-printed according to customer specifications.

CDs and DVDs

CD/DVD tags are constructed of a circular, adhesive Mylar tag that is applied directly to the CD or DVD. Two EM security tags are attached at right angles to the underside of the tag to ensure maximum detection – far superior to the typical parallel placement of tags. The tag can be applied to any CD or DVD with single-sided data recording.

NON-CIRCULATING MATERIAL

The products described above are available with permanent, non-deactivatable security tags for non-circulating items. These tags are used to secure reference materials that should not leave the library.

TailTag™

Description Double-Sided adhesive tag with tails
Dimensions (L x W) 3.5" x 0.25", 5" x 0.25, 6.5" x 0.25"
Packaging 1000 Tags/Package
Product No. 43200950 - Deactivatable
46200950 - Permanent

QuickInsert™

Description Double-Sided adhesive tag formatted in sheets
Dimensions (L x W) 5" x 0.25"
Packaging 1008 Tags/Package
Product No. 43200160 - Deactivatable

SpineTag™

Description Single-Sided adhesive tag
Dimensions (L x W) 3.5" x 0.25", 5" x 0.25
Packaging 1000 Tags/Package
Product No. 43200550 - Deactivatable
46200550 - Permanent

CD/DVD Tag

Description CD/DVD tag with two EM tags at right angles. High Temperature
Dimensions Tags (L x W) 3.5" x 0.25", Tag 4.5" Diameter
Packaging 100 Tags/Package
Product No. 43200920 - Deactivatable

CombiTag Kit™

Description EM Security Tag with Readable Sequential Barcode
Dimensions (L x W) EM Tag 3.5" Tag 4" x .75"
Packaging 1008 Tags/Package (minimum order – 2 packages)
Product No. 43200302 - Deactivatable
46200302 - Permanent
