

Remote Tuning

MM1 - RT

Voltage 110 V/220 V

Dimensions H: 56.5"
W: 26"
D: 3"

Antenna Weight 70 lbs

2966-01-1 Single Aisle
6218 System
(2 Antenna)

2966-02-1 Dual Aisle
6218 System
(3 Antenna)

MM 6218 Aisle Width - 36" To 48"

The MM1 - RT system is an effective theft deterrent for books, CDs, DVDs, and other collection items. The new remote tuning feature enables system diagnostics over the internet via an ethernet port. For the first time systems can be tuned without the cost of travel. If replacement components are required, an onsite visit will be necessary. The MM1's contemporary design fits into any library's décor and can protect aisles up to 48" wide. The MM1 system ensures the best protection for the library's collection by extending the detection field above and beyond the detection corridor

FEATURES

- ✓ Detects all industry-standard EM security tags
- ✓ Digital Signal Processing (DSP) ensures optimal detection of EM security tags while minimizing interference
- ✓ Corridor widths from 36" to 48"; Barrier-Free and ADA compliant
- ✓ Remote system diagnostics, configuration and tuning through the ethernet port with access to the internet
- ✓ System firmware upgrades available through the ethernet port with access to the internet
- ✓ Single, dual, or multiple corridors
- ✓ Electronic output to add additional security features (e.g., CCTV integration)
- ✓ Audible and visible alarm
- ✓ Direct mount or buried conduit installation
