ILS staff client software
Barcode scanner*

* can be purchased separately from Sentry Custom Security.

Dimensions:

Processing Plate Dimensions: 19.7" L x
13.8" W x 4.6"H
(50 cm x 35 cm x 12 cm)

Energy/Voltage:

110/120V or 220/240VAC
50-60 Hz

Weight (Approximate):

Processing plate weight: 17 Lbs (7.1Kg)

RFID Staff Workstation

ID-WS2

Model ID-WS2 combines check-out/in of materials via RFID. RFID labels are read by simply placing the item on the reader.

This unit reads RFID labels and performs barcode- to-RFID conversions using an optional barcode scanner. The ID-WS2 can be placed on a countertop or retrofitted flush with the counter.

The utility software package included with this unit adds troubleshooting capability as well as providing a count of the number of items processed.

FEATURES

- One Step check-out and check-in operations
- Ergonomic on-counter and in-counter installation options
- Safe to use with magnetic media (video, audio cassettes)
- Compatible with all ISO RFID standard labels
- Includes Utility Software for troubleshooting and obtaining check-out/check-in operations statistics
- Connects to the Library's ILS system
- Barcode-to-RFID conversions using optional barcode scanner

Models

ID-WS2 Combines check-out/in of materials via RFID technology. An optional Barcode scanner can be added to convert Barcode to RFID labels

ID-WS3 Converts Barcode to RFID and combines check-out/in of materials via Barcode and RFID labels.

CONFIGURATION OPTIONS

RFID Staff Workstations provide seamless integration with the library's circulation equipment through several configuration options.

Staff Workstations perform the following functions:

- All circulation activities, user services (record lookup, payment of fines) label assignment or correction, etc.
- Check-in activities, determine branch ownership of items, identify non- Library items, and hold status, etc.
- Conversion of barcoded materials to RFID

Model **ID-WS2** - Check-out/in of materials via RFID

(Can be placed on counter top or retrofitted/flush with the counter. Optional Barcode scanner can be added to covert Barcode to RFID labels)

Model **ID-WS3** - Check-out/in of materials via RFID and Barcode

(This model includes a built-in barcode scanner and can be placed on counter top or retrofitted/flush with the counter).

VALUE ADDED FEATURES

Workstations are ergonomic; installation options include on countertop or retrofitted/flush with the counter

Easy to install and use, offering maximum flexibility

One Step check-out and check-in operations save time for library staff. One simple hand action is used to read and deactivate/reactivate books, Videos, CDs and DVDs

Workstations include Utility Software for troubleshooting and obtaining check-out/check-in operational statistics

Connect to the ILS system and assists staff to minimize check-in and check-out errors

Compatible with Library supplied PCs, optical barcode scanners, and receipt printers

RFID read range of 12" (30cm)

Stations have a single output that can be connected directly to the ILS through a serial interface
