

Dave,

When I became the director of my small-town library, I reached out to Sentry to help address the issue of book security. Sentry was able to repair our existing electromagnetic entrance gates so that they once again functioned. They also helped us upgrade with new desktop deactivators and a portable wand reactivator - a MUST for any library. Throughout the years our Sentry rep has stayed in contact and has responded to questions, usually on the same day. It's very clear that Sentry values their customers - even small libraries! Working with Sentry has been a pleasure.

Jessica Diaz
