

Kind Words From National Park College Library...

Dave,

National Park College's new Sentry Custom Gate provides us with the most effective security on our precious library collection. It takes the burden off the librarians at the Patron Service's desk. We are very fortunate to be able to purchase beautiful mahogany gate panels. These panels enhance our entranceway and blend with our libraries décor. The wide aisles provide easy accessibility to accommodate wheelchairs or large groups of patrons. Additionally, the system's software provides us with our valuable statistics and quantitative information. The filters on the reports allow us to tweak the data to provide insight to our activity and planning. We had used a competitive product in the past but Sentry's gates, along with their excellent customer service, and support team surpasses the previous product and company's service.

Lynn Valetutti, MLIS

Library Director
