

## Stand-Alone Wireless USB Patron Counter

Wireless counters provide a low cost, easy to install, easy to use, easy to maintain method of gathering traffic counts manually or at your PC, **with no yearly fees.**

### Wireless USB Counter: Wall Mount

This completely wireless People Counting System is a reliable, user-friendly, and affordable tool providing libraries with accurate patron count information.

The transmitter unit transmits two infrared beams to the receiver unit. When a patron passes between the 2 units and breaks the infrared beams, the count increases by one. Data is stored in the Counter and extracted via a USB Port. Simply plug a thumb drive into the USB port to extract the data and then download to a PC.

Special SensorServer software allows librarians to analyze the data by hour, day, week, month, and year in table or graph form. Data can be downloaded as a csv file for viewing and manipulation in Excel. This valuable information reveals peak traffic periods to determine optimal operating hours and staffing requirements.

### Specifications:

- Dimensions - 116.4 x 68.6 x 22.3 mm
- Material - ABS Plastic - Black
- Power supply - 2 x 1.5V AA
- Power consumption - Approximately 120 uA
- Battery life - Approximately 4 years
- Maximum counting distance - 20 feet (6 m)
- Data - USB
