

Sentry RF Tags are 100% compatible with all industry-standard Library RF Security Systems, including 3M and Checkpoint Systems.

Our RF Tags are available in 8.2 MHz or 9.5 MHz to suit the frequency of your existing library security system.

Sentry RF Tags produce excellent detection in RF Library Security Systems and adhere very well to print materials, deterring thieves from removing the tags and leaving the library with materials that have not been properly checked out.

8.2 MHZ RF STICKER TAGS

- | | |
|----------|--|
| 35201265 | 1.5" 8.2 MHz Plain White, Non-Deactivatable, RF Sticker Tag, 1,000 per roll |
