

RFIDProtect™

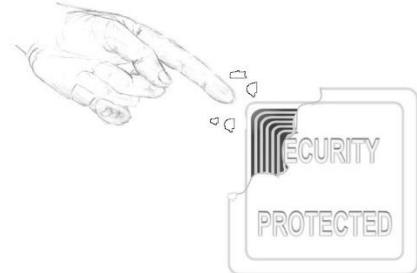

RFIDProtect™ enhances security of an RFID label. RFID labels can be easily identified and removed by patrons when applied to the surface of a book, lock box, etc. RFIDProtect™ solves this issue by covering the tag with a yellow or custom printed destructible cover label.

The cover label uses pH neutral adhesive and is designed to fragment when removal is attempted. This slows the patron and draws attention to unwanted activity.

Visible theft deterrents, a larger adhesive footprint and destructible label features reduce tag defeats. RFIDProtect™ labels are applied in-library by hand or using a rapid handheld applicator.

Dimensions:

2.88" x 2.88"
73.03 mm x 73.03 mm

FEATURES

- ✓ Printed format hides the RFID Label
- ✓ Aggressive pH Neutral adhesive
- ✓ Maintenance-free
- ✓ Manufactured in North America
